Project Title: Harry Styles Website

For this project, my goal is to create a website about the famous pop singer, Harry Styles. Throughout the site, I want to take the users through his journey gaining fame and being an iconic figure for younger audiences through his fashion that breaks societal norms and acting presence in films that depict LGBTQIA+ communities and breaks traditional film style. I plan to break out these sections into a timeline organized across several pages since there is a multitude of information within each category.

Home Page/Introduction – Overall of who he is personally and professionally, slightly talking about him as an influential figure and advocate within the music industry.

Early life - Talk about where he grew up and his familial life

Harry Styles' career - Refer to his start on *The X Factor* and One Direction, becoming a solo artist as well as releasing his first album/going on tour, and his facting roles in *My Policeman* and *Don't Worry Darling*

Artistry - Talk about his music inspiration and band members

Cultural Status/Advocacy- Reference his influence on fashion/response to social issues/political events

Personal life - Talk about his religion, tattoos, relationships

Sources – A list of sources, including the Wikipedia page and photograph citations.
